International application No. PCT/KR2004/002247

	3ox	No.	I Basis of the report		
	1.		h regard to the language, this report is based on the international application in the language in which it was filed, unless trwise indicated under this item. This report is based on translations from the original language into the following language English which is the language of a translation furnished for the purposes of: international search (under Rules 12.3 and 23.1(b)) publication of the international application (under Rule 12.4) international preliminary examination (under Rules 55.2 and/or 55.3)		
2		to the annex	regard to the elements of the international application, this report is based on (replacement sheets which have been furnished execeiving Office in response to an invitation under Article 14 are referred to in this reort as "originally filed" and are not exed to this report): the international application as originally filed/furnished

Вс	Box No. IV Lack of unity of invention				
1.		In response to the invitation to restrict or pay additional fees the applicant has, within the applicable time limit: restricted the claims paid additional fees paid additional fees under protest and, where applicable, the protest fee paid additional fees under protest but the applicable protest fee was not paid			
	5-71	neither restricted nor paid additional fees. This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, not			
2.	\boxtimes	to invite the applicant to restrict or pay additional fees.			
3.	This	Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is : complied with. not complied with for the following reasons: This application consists of two groups of inventions as follows: Group II: Claims 1-3, 9-15 are directed to the monohydrate of 7-carboxymethyloxy-3',4',5-trimethoxyflavone, preparation method and uses thereof. Group II: Claims 4-8 are directed to the preparation method of 7-carboxymethyloxy-3',4',5-trimethoxyflavone(nonhydrate). The inventions listed as Groups I and II do not relate to a single inventive concept under PCT Rule 13.1 because Group II does not have the technical feature regarding monohydrate of formula 1 which Group I has.			
4	l. Con	sequently, this report has been established in respect of the following parts of the international application: all parts. the parts relating to claims Nos.			

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/KR2004/002247

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

	1. Statement					
	Novelty (N)	Claims	1 - 15		 	<u>Y</u> ES
		Claims			 	NO
	Inventive step (IS)	Claims	1 - 15	•	 · ···	YES
		Claims			 	NO
	Industrial applicability (IA)	Claims	1 - 15		 	YES
		Claims				NO
1	ſ					

2. Citations and explanations (Rule 70.7)

The following documents are referred to in this report:

D1: Arch. Pharm. Res. Vol.22(4), pp.354-360 (1999)

D2: US 6025387 (15 Feb. 2000)

D3: US 5399584 (21 Mar. 1995)

D4: EP 505937 A1 (30 Sep. 1992)

1. Novelty

Claims 1–3 and claims 9–15 of the present invention relate to a monohydrate of 7–carboxymethyloxy–3',4',5–trimethoxyflavone, a preparation method thereof and a pharmaceutical composition comprising the same. Claims 4–8 of the present invention relate to a preparation method of 7–carboxymethyloxy–3',4',5–trimethoxyflavone with no pressure and no column chromatography.

D1 discloses the effect of 7-carboxymethyloxy-3',4',5-trimethoxyflavone on experimental animal models of inflammatory bowel disease. D2 discloses gastroprotective flavone/flavanone compounds including 7-carboxymethyloxy-3',4',5-trimethoxyflavone with therapeutic effect on inflammatory bowel disease.

D3 discloses the use of flavone derivatives for gastroprotection.

D4 discloses flavone derivatives, a process for the preparation thereof and pharmaceutical compositions comprising them.

None of D1-D4 discloses the said monohydrate, a preparation method thereof and a pharmaceutical composition comprising the same in claims 1-3 and 9-15 of the present invention.

Thus, claims 1-3 and claims 9-15 of the present invention are considered to be novel over D1-D4.

None of D1-D4 discloses the said preparation methods in claims 4-8 of the present invention. Therefore, claims 4-8 of the present invention are considered to be novel over D1-D4 [Article 33(2) PCT]. (Continued on Supplemental Sheet.)

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of:

Box V.

2. Inventive Step

There is no implication or suggestion to lead those who skilled in the art to expect that the monohydrate of 7-carboxymethyloxy-3',4',5-trimethoxyflavone has more favorable physicochemical properties than the nonhydrate of 7-carboxymethyloxy-3',4',5-trimethoxyflavone in D1-D4.

Thus, the inventive step of claims 1-3 and claims 9-15 can be acknowledged over D1-D4.

There is no implication or suggestion to lead those who skilled in the art to expect that 7-carboxymethyloxy-3',4',5-trimethoxyflavone(nonhydrate) can be synthesized with no pressure and no column chromatography.

Therefore, the inventive step of claims 4-8 can be acknowledged over D1-D4 [Article 33(3)] PCT].

3. Industrial Applicability

The subject-matter of claims 1-15 appears to be industrially applicable [Article 33(4) PCT].
